- Debugged an application and handled bugs/defects to improve the performance significantly.
- Implemented test case for Angular application increasing code coverage to 80%.
- Actively participated in meetings with scrum masters and client which gained the insights into client requirement and end goals.

## TECHNICAL SKILLS

- |                         |                    |                        |
|-------------------------|--------------------|------------------------|
| • Angular               | • Angular Material | • Angular Unit Testing |
| • Typescript/JavaScript | • Chart JS         | • Agile Methodologies  |
| • Git/GitHub            | • API Integration  | • React JS             |

## PERSONAL PROJECTS

### Weather App (Angular)

- Created Weather App using Angular 15 and Node 18.
- It provides weather details like temperature, humidity, air quality, UV index etc. based on different locations.
- Used icons and images to conditionally render images based on the weather type.
- Integrated API using Rapid API.
- Tools and libraries used such as Git/GitHub, bootstrap, Rapid API, ngx ui loader etc. Link:  
<https://github.com/ExdKaz/WeatherApp>

### Personal Portfolio (React)

- Created personal portfolio using React 18.
  - It is a responsive website with basic animations and email feature.
- Link: <https://github.com/ExdKaz/portfolio>

## EDUCATION

### Bachelor of Engineering (Information Science)

2017-2021

HKBK college of Engineering, Bengaluru, Karnataka  
Aggregate - 75 %
